

ESIID Check

RetailEnergyDesk is a complete back office portal solution for retail electric companies operating in the de-regulated marketplace. RetailEnergyDesk offers a 'solution framework' as opposed to a 'pre-packaged solution' to cater to the custom requirements of the unique business model of energy retailers. The 'RetailEnergyDesk Solution Framework' provides essential analytical information that helps electric retailers make effective and timely decisions.

RetailEnergyDesk Modules

- Customer Pricing
- Deal Capture System
- Downloads
- ESIID Check**
- Load Forecast
- Meter Data Management
- Price Forecast
- Schedules

ReD ESIID Check is a specific application for the ERCOT market to validate ESIID account information. This web based application uses an API to fetch ESIID details from ERCOT and then can be linked to other verification protocols. The results can be used in the sales process to develop a Letter of Authorization for obtaining data from the TDSP. The results directly feed into the **ReD Customer Pricing** application to continue the pricing process and the customer enrollment process. Data can be easily exported into Excel.
