

Deal Capture

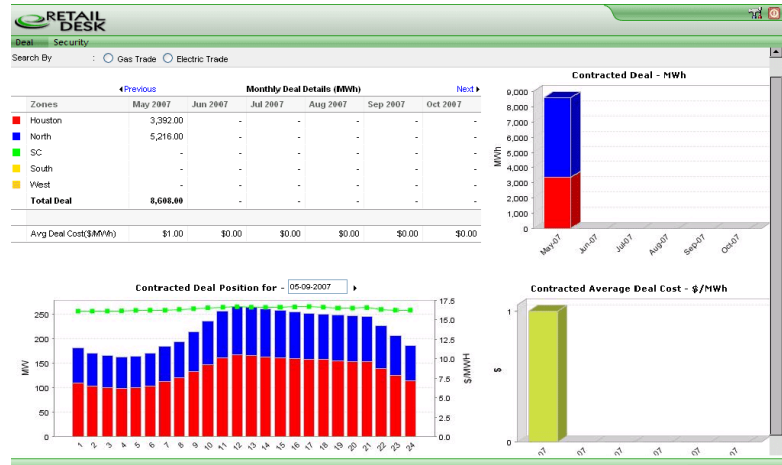

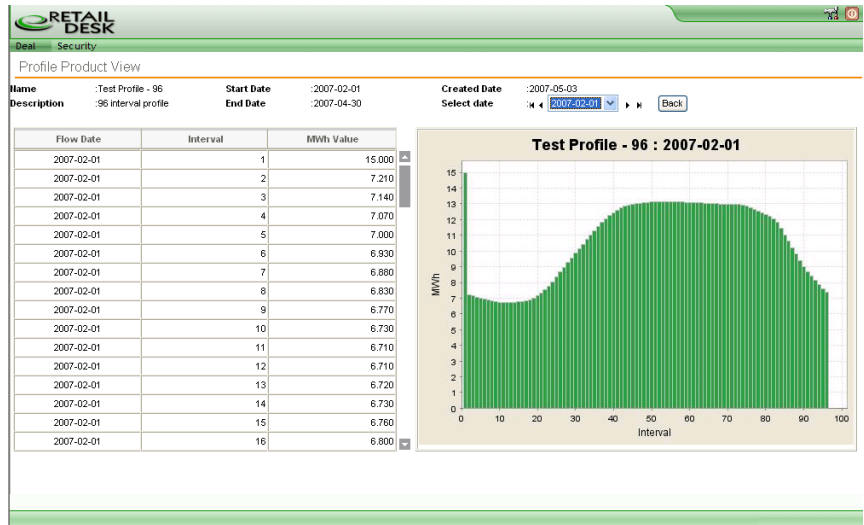

RetailEnergyDesk is a complete back office portal solution for retail electric companies operating in the de-regulated marketplace. RetailEnergyDesk offers a 'solution framework' as opposed to a 'pre-packaged solution' to cater to the custom requirements of the unique business model of energy retailers. The 'RetailEnergyDesk Solution Framework' provides essential analytical information that helps electric retailers make effective and timely decisions.

The **ReD Deal Capture System** is an easy and user friendly way to capture trades made on different products including Electric (both fixed price and heat rate), Gas and Option trades. One of the key features of the application is that it can easily integrate with other modules such as the *ReD Load Forecast* to provide Position Reports, *ReD Schedules* to directly submit schedules to the ISO, and *ReD Downloads* to obtain market prices for mark to market positions or forecasted profiles for settlement purposes. As each trade is done the information is entered into the system that keeps an audit trail of changes to trades and the credit limits assigned to individual traders. A multitude of reports allows the user to check against counterparty invoices, examine individual trades, and evaluate positions in each interval.

RetailEnergyDesk Modules

- Customer Pricing
- Deal Capture System**
- Downloads
- ESIID Check
- Load Forecast
- Meter Data Management
- Price Forecast
- Schedules
