RetailEnergyDesk is a complete back office portal solution for retail electric companies operating in the de-regulated marketplace. RetailEnergyDesk offers a 'solution framework' as opposed to a 'pre-packaged solution' to cater to the custom requirements of the unique business model of energy retailers. The 'RetailEnergyDesk Solution Framework' provides essential analytical information that helps electric retailers make effective and timely decisions.

RetailEnergyDesk Modules

- Customer Pricing
- Deal Capture System
- Downloads**
- ESIID Check
- Load Forecast
- Meter Data Management
- Price Forecast
- Schedules

ANB Systems is a specialized consulting and technology services firm focused on the Energy and Utility industries. Its US offices are in the Houston and Philadelphia metropolitan areas with a state-of-the-art software development and delivery center in Chennai, India.

ReD Downloads is an easy and automatic way to download and maintain daily market information such as prices, load profiles, and other routine scheduled publications by the ISO or from other third parties. The downloads are done through a number of methods including API, XML, Web Services and even screen scraping when no other option exists. The downloaded information is parsed and put into databases and then displayed graphically. All downloaded information can be exported to Excel. This module provides the data needed by other **ReD** modules such as the **ReD Load Forecast** and **ReD Price Forecast**. It can also be linked to other databases such as the Customer Information System or any third party databases to periodically upload and display other critical information needed to run an effective business.

Energy Metric	Next Scheduled Time	Last Runtime	Run Status	Manual/Automatic	Schedule Status
<input type="radio"/> Market Clearing Price for Energy(Minutes)	5/16/2007 12:30:00 AM	5/16/2007 12:15:00 AM	✓	Automatic	✓
