

Schedules

RetailEnergyDesk is a complete back office portal solution for retail electric companies operating in the de-regulated marketplace. RetailEnergyDesk offers a 'solution framework' as opposed to a 'pre-packaged solution' to cater to the custom requirements of the unique business model of energy retailers. The 'RetailEnergyDesk Solution Framework' provides essential analytical information that helps electric retailers make effective and timely decisions.

RetailEnergyDesk Modules

- Customer Pricing
- Deal Capture System
- Downloads
- ESIID Check
- Load Forecast
- Meter Data Management
- Price Forecast

Schedules

ANB Systems is a specialized consulting and technology services firm focused on the Energy and Utility industries. Its US offices are in the Houston and Philadelphia metropolitan areas with a state-of-the-art software development and delivery center in Chennai, India.

ReD Schedules is an application that manages the scheduling function for multiple market participants (REPs and QSEs) in the ERCOT control area. Currently configured for a Level 2 QSE, this module works in tandem with the **ReD Downloads** module to automatically download Ancillary Services once a day from ERCOT. Additionally, this module in conjunction with the **ReD Deal Capture System** can submit interval or hourly energy and ancillary services schedules to ERCOT. Finally, Schedule Mismatches are monitored at user defined intervals and alerts are issued when there are mismatches. ReD Schedules helps QSEs prepare, validate, and submit their schedules to ERCOT on demand. It has many user friendly features such as the flexibility to replicate the existing schedule as a new schedule. The application works for an REP acting as their own QSE or QSE's submitting schedules for a number of market participants.

S.No	Ref. No.	Hours	Counterparty	Zone	Contracted MWh	Total MWh	Buy/Sell
1	1179559954029	ALL-15 Minutes	QSE2	Houston	1.0	24.0	Buy
